SKILLS

- **Languages:** C++, Python, Java
- **Tools & Platforms:** MySQL, Git, GitHub, VS Code, Jupyter Notebook, MS Excel
- **Core CS Fundamentals:** DBMS, OS, CN, SQL, OOPs
- **Soft Skills:** Team Player, Adaptability, Quick Learner, Problem Solving

PROJECTS

Smartphone Addiction Analysis | GitHub

Dec' 25

- Developed a comprehensive Machine Learning project to analyze smartphone usage behavior and predict addiction levels, implementing data preprocessing, feature engineering, and model training using Python.
- Conducted in-depth Exploratory Data Analysis (EDA) to uncover behavioral trends, correlations, and significant features influencing addiction patterns, supported by clear data visualizations.
- Built and evaluated multiple classification models, compared their performance using metrics such as accuracy and F1-score, and interpreted results to extract actionable insights from the dataset.

Tech stack: Python, Scikit-learn, Seaborn, Matplotlib, NumPy, Machine Learning.

Blockchain Based Voting system | GitHub

Aug' 25

- Architected and implemented a decentralized online voting application using blockchain principles to ensure transparency, immutability, and secure storage of ballots, eliminating risks of data tampering in digital elections.
- Developed the complete block creation workflow including cryptographic hashing, chain validation logic, and consensus handling to maintain a verifiable and tamper-resistant ledger of voting transactions.
- Built a web-based system with secure login mechanisms, role-based access control for administrators and voters, and real-time vote recording and result visualization to enhance trust and operational efficiency in the election process.

Tech Stack: Python, Flask, HTML, CSS, Blockchain Architecture, Cryptographic Hashing.

TRAINING

Android Developer Pro : MoodBoard Application | Certificate

Jul' 25

Lovely Professional University (Centre for Professional Enhancement).

- Completed the Android Developer Pro skill development program organized by the Centre for Professional Enhancement, Lovely Professional University, focused on industry-relevant Android development practices.
- Built a strong foundation in Android application development through hands-on implementation of real-world use cases and guided projects.
- Worked extensively with Android Studio, applying Java/Kotlin programming concepts, designing responsive user interfaces, and managing activities, intents, and application lifecycle components.
- Gained end-to-end exposure to the Android app development lifecycle, including requirement analysis, UI design, coding, testing, debugging, and understanding the Play Store publishing workflow.

CERTIFICATES

- Virtual Internship in Data Science - [Skillcraft](#) Aug' 25
- Gen AI Academy – [Google Cloud](#) Jul' 25
- Databases and SQL for Data Science with Python - [IBM](#) Jun' 25
- Cloud Computing – [NPTEL\(IIT Kharagpur\)](#) Apr' 25

ACHIEVEMENTS

- Solved 100+ coding problems across competitive platforms. Jun' 25
- Secured 5th Place in Capture the Flag (CTF) Hackathon, showcasing strong problem-solving skills Sep' 24

EDUCATION

Lovely Professional University

Bachelor of Technology - Computer Science and Engineering; **CGPA: 8.27**

Phagwara, Punjab

Aug' 23 – Present

Vidyagyan School

Intermediate; **Percentage: 88.2**

Ghaziabad, Uttar Pradesh

Apr' 21 – May' 23

Vidyagyan School

Matriculation; **Percentage: 94.6**

Ghaziabad, Uttar Pradesh

Apr' 20 – May' 21
